Optimize, Streamline, and Mobilize Field Service Operations

Maximize dispatching by scheduling the right people at the right time and obtaining real-time data for work in the field. Seamless integration to inventory, purchasing, and projects provides service organizations with everything they need to grow their business.

WITH ACUMATICA FIELD SERVICE MANAGEMENT, YOU CAN

- **Manage Contracts:** Oversee contracts for sale, service, and recurring maintenance.
- **Schedule Appointments and Resources:** Assign technicians by workload, skills, or location. Update schedules instantly and support single or multi-day appointments in the field.
- **Plan Inventory:** Track and transfer inventory in warehouses and vehicles. Automate replenishment to avoid shortages and costly rush orders.
- **Improve Mobility and Time Tracking:** Technicians use a mobile app for navigation, e-signatures, expense capture, and payment. Clock-in and persistent timers make job tracking easy, with seamless job switching and no double entry.
- **Manage Projects:** Track multi-phase projects, billing, and budgets. Manage billing with fixed-price, cost-plus, or capped project costs. Management.
- **Improve Customer Visibility:** Integrate with CRM for sales and support insights. The customer portal gives clients access to invoices and real-time information.

"Prior to Acumatica, we would spend a lot of time in multiple different systems. Now we spend all our time in Acumatica, and it allows management to see what we're doing at any given time."

—Daniel Ruiz, Field Service Manager, OFS International

> CUSTOMER STORIES

Calendar Boards

Create new appointments or assign resources to scheduled ones. View resource schedules by day, week, or month. Generate different views by filtering appointments into subsets to facilitate easy viewing for multiple dispatchers, grouping by technician, skills, service areas, or type of work.

Appointment Scheduling

Update technician schedules from the office or field. Technicians can start and end appointments, pause for travel or breaks, and provide instant status updates. Use the mobile app clock-in tool with a persistent timer and seamless job switching, so teams capture accurate time entry without double data entry or extra navigation.

Inventory Planning

Track inventory by warehouse location. Identify inventory serial or lot detail. Transfer inventory between physical or mobile warehouse locations. Manage inventory based on usage and run replenishment reports to avoid costly rush orders.

Resource Scheduling

Schedule technicians based on workload, location, skill, or certifications. Ensure technicians have the right equipment and inventory to complete the job.

Resource Tracking on Maps

Visualize the anticipated route for the technician. See GPS location of technician on map if needing to make any emergency change to schedule or communicate timing with customer.

Mobile App

Update appointments on the road or at customer locations using the mobile application available for Android and iOS. Access customer history, capture payments, and capture signatures directly from your mobile device. Enter expense receipts and streamline service expense workflows with scanned receipt image recognition from the mobile app.

Self-Service Portal

Empower customers with online access to customer account information. The portal lets them review invoices, request quotes, and download invoices, statements or other documents. Give customers service-related updates through the portal.

Multi-Language and Localization

Support multiple languages, date formats, and number formats. Define defaults by user for both the web and mobile applications.

Equipment Management

Extend Service Management by adding the Equipment Management application. Record the history of customer-owned or company-owned equipment. Create maintenance and service schedules with recurring appointments.

Warranty Management

Establish warranty offers for your customers, specifying which parts are under warranty to avoid confusion, mischarges, and objections. Multidimensional contracts (different warranty periods for various components of the system) help to track warranties from sales to repair in the field, specifying what is covered and what is not.

Enterprise-Wide Integration

Convert CRM opportunities into service orders and create service appointments from opportunities or projects. Allocate stock items to service orders and generate purchase orders from the field. Create appointments for a project and manage budgets and profitability across projects. Capture time for payroll. Manage inventory with integrated purchasing, requisitions, and robust inventory replenishment logic.

Flexible Billing

Generate invoices based on estimations or actuals and group them by service order, period, or customer purchase order. Set different billing rules for the customer and for service order types. Contract billing can be scheduled at the beginning of the month, end of the month, or on demand when work is completed. Billings may be a fixed amount or based on time and materials. Simplify cost tracking by linking accounts payable bills to field service appointments for comprehensive expense management and financial analysis by appointment.

Contract Renewals

Create, renew, and monitor contracts for accurate agreements that provides transparency to customers and finance teams.

Side Panels

Use side panels for a quick and comprehensive view of key data without navigating out of the current window. Easily drill down into relevant details on any record selected with standard prebuilt side panels or build custom side panels for different uses and roles.

ABOUT ACUMATICA

Acumatica Cloud ERP is a comprehensive business management solution that was born in the cloud and built for more connected, collaborative ways of working. Designed explicitly to enable small and mid-market companies to thrive in today's digital economy, Acumatica's flexible solution, customer-friendly business practices, and industry-specific functionality help growing businesses adapt to fast-moving markets and take control of their future.
